Instructions to change the output setting on the Apollo Solar TSW Inverter.

1. Run the AIM Software. The following screen will appear:

![Communication Tool](image1)

2. Select “Apollo Inverter” from the pull down menu. The following screen will appear:

![Apollo Inverter Manager](image2)

3. Connect the AIM device & Cable between the Inverter & the USB Port of you Computer.
4. Power Up the Inverter & put it in standby by pressing the Standby button.
5. Select the correct COM Port for your AIM device.
6. Select the correct Comm. ID for your inverter (the default is 32).
7. Press the Connect button and verify that the box to the right displays “Connecting…”.
8. Select the Control parameter tab. The following screen will appear:
9. Set the **Volt. Select** to 1 (for 230V Operation).
10. Set the **Freq. Select** to 1 (for 50Hz Operation).
11. Press the Update Button.
12. Reboot the Inverter for the output to reflect the changes.
